The status of the claims is as follows:

Claims 1-10 have been cancelled; and

Claims 11-19 are herein addressed below.

The disclosure is objected to because of the following informalities: throughout the specification, it appears that some of the language is not readily readable because of the ink. A new entire readable copy is requested by the Examiner.

Appropriate correction is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claims 11-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 1-2, it is not readily apparent if the applicant is claiming a balancing device or a balancing device in combination with a suspended element. Throughout the claims, the applicant positively recites the suspended element. If the applicant intends on claiming the combination, then the applicant should clearly and positively set forth the suspended element in the preamble. In claim 15, line 2, the phraseology "bush" is not readily understood by the Examiner. Does the applicant mean "bushing"? In claim 17, lines 1-2, the phraseology "blocking of the friction disc against the support leads to blocking of the rotation also of the end of the elastic means" appears to be awkward and not readily understood by the Examiner. In claim 18, lines 1-2, the phraseology "the blocking by rotation of the friction disc" is not readily understood by the Examiner. Specifically, what is meant by "blocking", "blocking" of what? In claim 19, line 2, the phraseology "a drum to provide present a larger wider development" is not readily understood by the Examiner.

Depending on the applicant's amendments, claims 11-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to Krupke et al. disclose a counterbalance device similar to that of the applicant's invention.
